

Report of Head of Regenerative Tourism

Subject: Request for member representation as stakeholders for Oriel y Parc Masterplan.

Purpose of Report

To ask members to elect two representatives to act as stakeholders in consultations regarding the further development of the Oriel y Parc Masterplan.

Selected members will be asked to join no more than four meetings before March 2025 to provide member representation and to feedback to the wider group.

Introduction/Background

Consultants have been commissioned to develop the 2023 Masterplan for Oriel y Parc into comprehensive design concepts, including the development of solutions, designs and costings in order to transition the current Masterplan into a commissionable build project at the next phase.

As well as Architectural Design, the commission includes the production of an Interpretation Plan, developed from the research, strategies, and approach in the 2023 Masterplan document.

As part of the ongoing consultation process, we would like to ensure there is member representation within the discussions and would ask representatives to feedback to the wider member group.

Comparisons

N/A

Options

A member workshop has been considered; however, the project is not at a stage where a workshop would be appropriate. We are looking for member representation within discussions around the development of the Centre to help shape the project.

Financial considerations

Member time will be required. Meetings are anticipated to take place online.

Risk considerations

If we do not have member representation, we would be limiting the views and potential scope of the developments.

N/A

Wider implications

A wide range of stakeholders and officers have been involved and invited to be a part of consultations within the ongoing development of the Masterplan.

Conclusion

To ensure the development of the Masterplan process is robust and considered within the overall strategy and priorities of the National Park Authority, members are asked to elect two representatives to join the discussions and feedback to the wider group.

Recommendation:

To elect two Member representatives to be a part of discussions in the development of the Oriol y Parc Masterplan.
